About This Game

Chief's Quest is a classic action platform game inspired by native american culture as well as anime movies such as "Princess Mononoke" and "Nausicaä of the Valley of the Wind"

This game about the young warrior Mikasi from the Big Bird tribe.
Mikasi's father instructed his son to find and bring back home the mischievous little sister.

So our hero goes on a journey in search of his missing sister.
The road is full of dangers, dire animals and evil spirits inhabit these lands.
But brave and courageous Mikasi is ready to challenge all difficulties!

- Classic action platformer
- A variety of locations with unique enemies and traps
- Colorful pixel art graphics
- Beautifully animated characters
- Secondary weapons, allowing to change combat tactics

This is a necessary measure, because from our country it is impossible to register a project on a kickstarter without intermediaries.

Therefore, we are extremely grateful to everyone who buys our project at an early stage!
if you played our game and you like it, please write a short review, it will really help us.

Nuances:

At the moment in our game there are 3 music tracks written by Inigo Del Vale

Our studio consists of only two people, so the main goal for us - visual quality and balanced gameplay.

If we can sell about 1000 copies, then we will make a full OST with 10-12 original tracks (we don't actually have a budget).

For now game run at 1920x1080 resolution(but 720p looks almost the same) and got full support for xbox360 and Dualshock4 gamepads.

If you have a gamepad of other brand, you may use the x360ce emulator.

It's not a bad add-on. In terms of getting the train moving it's the same as the BR Class 101 in terms of gear change as you go. Outside appearance is very similar to the 101 as well with the notable changes being in the passenger compartment and drivers cab. Not entirely certain if the both the 101 and 105 shared the same type of engine but it does sound the same. This will likely change once a 3rd party sound pack is installed if the player chooses to do so.. Disclaimer:

I somewhat know the developer and it influenced my decision to buy the game.

I got to play the demo a few times before release as part of a let's read.

Other than that I went into the game blind.

#####

</reality> was an interesting read, when I first started reading I had a story it was going to tell in mind, and I was pleasantly surprised when said story added more than one twist and thus unpredictability to itself becoming not what I had predicted but a much more interesting story that gripped me until the very end of my first playthrough.

That being said it does have a slow start and it would have been nice to see some hints of the twists to come during book one...

TL;DR

The story is not what you may expect and picks up some steam in the second chapter(or Book) and rides it all the way to the end. It definitively was worth my time, and the ~10 Euro I put into it.. 8-бит, ммм! Не играйте на лёгкой сложности, а то интерес к игре потеряете сразу. Убиваем всё что на вас нападает и подбираем лут из бочек. Что делает 2 и 3 абилка не понял. Точней эффект не почувствовал.. **Awesome game!!**

Really cool game, nice graphics, fun zombies mode, cool Multiplayer (I don't know about all these people saying that there are almost no players but there are actually pretty much) and an awesome campaign.

It is a bit expensive for a game made in 2010, but it's definitely worth your money!

Real recommendation!

-**The Awesome Pear.** A friend of mine bought this as a revenge for a game that I gave him. As a university student learning Tourism and Leisure Management, this game was kind of fun and insult. :D Even though it was just 18 minutes I enjoyed it but wouldn't recommend it for that price, maybe if you want to prank a friend or something.

(Loved the new Update with all those invisible achievements added...xD). Buggy clunky & basically crap. the game is windowed mode only, if you want to take a screenshot it will reset the game. won't recommend it. Hey! Today I am here to say something about this game!

/Positive/

- + Cheap (7€)
- + Not much of these games on steam
- + Special concept

/Negative/

- Boring..

I give this game 6,9/10

Perfect VR game for anyone! Simply controls even without any actual controllers and very replayable and addictive to get to the high scores!. Great game that tests your thinking.. Im just going to list some things for you...

The only game you can play is bowling.

Theres music but you cant dance or strike any poses, the only things you can do is Bowl and Sit down (which takes a whole minute)

Nobody wants to be there. (The most people ive met and talked to were 2)

Looks like a Space Channel 5 level.

CHOOSE LOW QUALITY! Or else youll have 16 fps, oh and you cant edit the quality, you can only choose High or Low

Yes i understand that this is "Early Access" but it looks like its nowhere near complete. I had to download some separate Unreal thing that didnt help with the visuals at all. It looks like someone only worked on the map and half♥♥♥♥♥♥the rest.

Good luck to you with future games.... WASTE OF MONEY!!!

They story is good, but way to short!!! You also pay way too much for what is an unfinished story!!

The author has begun to only care about the money relasing the story in multiple segements rather than 1 complete story.... I like the game, and I play on it often, I thinking about getting all the game. Shows up as "founders pack" in the Steam library. The only difference between this and the pre-release founder purchases is an in-game animated profile avatar and the price.

So if you missed out on being a true founder with a .gif for an avatar, this has literally everything else they got - the animated weapon skins and the M4A1 and L115A5 cosmetic variants. Multiple other permanent weapons and three characters as well. All but the unique weapon skins are available in-game without buying the package, though they'll likely cost you more. Bit pricey, costing more than a AAA game but if you do plan on playing LoS and have the money on hand I'd recommend picking it up to save a lot of time grinding GP, as well as real money should you choose to purchase the individual items with gems in-game.

Hello players!

Thank you all for supporting our project!

Sorry for being out of schedule, one of our pc has broken.

Because of it, this major update contain only the half of new level.

But also we added something new for the first level!

So...what do we have here:

- New animation and pattern for the first boss.
- New NPC.
- New level with 13 locations.
- 3 New enemies.
- Replaced some animations (deathcloud was ugly).
